MINISTER FOR
CHEMICALS & FERTILIZERS
GOVERNMENT OF INDIA

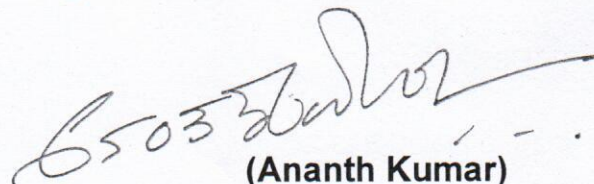

MESSAGE

Fertilizers and the Chemical industry is an integral part of any manufacturing process across the spectrum of business. Therefore, Sustainable Chemistry and Engineering can play a powerful role in ensuring that Industries follow processes that reduce depletion of finite natural resources with viable alternatives, development of eco-friendly product and processes, reduce and recycle waste and prevent toxic impact on the environment.

I am pleased to know that SusChemE, the International Conference on Sustainable Chemistry and Engineering will be organized for the first time in India by the Institute of Chemical Technology (ICT) and partnered by MM Activ Sci-Tech Communications Pvt. Ltd. It will serve as a Forum where R&D and Industry will deliberate on Chemistry driven and engineering technological advances to provide critical solutions for humanity and ensure sustainable development of modern societies.

I wish this International Conference a grand success.

(Ananth Kumar)
