

SusChemE 2015

International Conference on Sustainable Chemistry & Engineering

October 8-9, 2015, Hotel Lalit, Mumbai

Title of Extended Abstract (Font 14, Times New Roman)

Presenting Author¹, Second Author², Third Author¹ (Font 12, Times New Roman)

¹Mailing address including affiliated company / institution / university (Font 10, Times New Roman)

²Mailing address including affiliated company / institution / university (Font 10, Times New Roman)

E-mail addresses: first author, second author, third author (Font 10, Times New Roman)

1. Introduction:

It is very important to write any extended abstract in a proper format [1]. Here, we have discussed the template of the extended abstract. We ask authors to follow some simple guidelines. Extended abstract should be divided into various sections such as Introduction, materials and methods, significant results and discussion, conclusion and references [2].

2. Material and Methods:

This part should explain the material used for the work. Further it is required to discuss the experimental methodology along with the analysis in brief.

3. Significant Results and Discussion

This section is very important which covers the brief discussion on the important experiments performed with brief analysis [3]. It is recommended to use following format

3.1 Page Layout

The margins must be set as follows:

- Top = 1.7cm Bottom = 1.7cm
- Left = 1.7cm
- Right = 1.7cm

All paragraphs must be justified, i.e. both left-justified and right-justified.

3.2 Text Font of Entire Document

The entire document should be in Times New Roman 10 font, the headings should be in bold whereas title of the subsections should be in italics

3.3 Equations:

Number equations consecutively with equation numbers in parentheses with the right margin e.g. (1). Preferably equations should be contained in one column width. Use Equation editor

3.4 Figures and Tables

Report important figure (Graphs, reactions scheme, process flow etc) in extended abstract which highlights important findings and figure captions should be centered below the figures with figure number. Table captions should be centered above. **Table 1** and **Figure 1** shows the demonstration of how to add table and figures. Also the figures and tables should be included in one column width

Table 1: Format of Table

| Sr. No. | Paper font Times new roman | | |
|---------|----------------------------|----------|-------------------------|
| | Regular | Bold | Italic |
| 1 | Normal text | Headings | reference item in table |
| 2 | | | |

3.5 Page Number:

Page numbers must be included at the bottom centred. **The number of words should not be more than 500 excluding the title and authors details.**

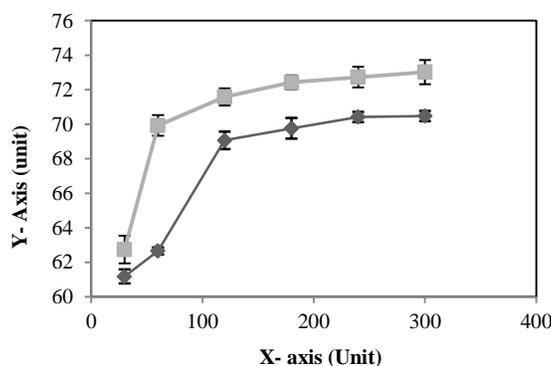

Figure 1: Effect of X- axis on Y- axis

4. Conclusions:

It is compulsory to submit the paper in given format. You may use this template as it is. The easiest way to do this is simply to download the template, and replace (copy-paste) the content with your own material.

References (Times new roman font size 10)

All the references should be cited in the text sequentially using numerical values e.g. [1]. **References should not be more than 3.** References should be given as per **journal of catalysis** format as follows.
